

# MATERIAL SAFETY DATA SHEET

## Section 1. Chemical product and company identification

Product Name: ICE Liquid Agent  
Synonym: Low Temperature Foam Solution (Amerex 22006)

Manufacturer: AMEREX CORPORATION  
Internet Address: [www.amerex-fire.com](http://www.amerex-fire.com)  
Address: 7595 Gadsden Highway  
P.O. Box 81  
Trussville, AL 35173-0081

Telephone: (205) 655-3271  
Emergency Contacts: Chemtrec: (800) 424-9300 or  
(703) 527-3887

Revised: January, 2015

---

## Section 2. Hazard identification and emergency overview

Physical description: Clear to opaque liquid solution.

Adverse health effects and symptoms: Eye irritant, possible skin irritant

Exposure guidelines:

The chemicals in this product are not listed in OSHA Subpart Z and do not have permissible exposure limits (PELs). The values below are general values for particulates not otherwise regulated – PNOR (OSHA), also termed particulates not otherwise classified – PNO (NIOSH), and particulates not otherwise specified – PNOS (ACGIH). Note these levels are for insoluble (dry) forms of product ingredients.

Ingredients	OSHA PEL	ACGIH TLV	DFG MAK *
Water			
Potassium Acetate	15 mg/m <sup>3</sup> Total Dust  5 mg/m <sup>3</sup> Respirable	10 mg/m <sup>3</sup>	10 mg/m <sup>3</sup> Inhalable Particulate  3 mg/m <sup>3</sup> Respirable

			Particulate
--	--	--	-------------

\*German regulatory limits; NR = Not Regulated

Hazard symbols:

HAZARD SYMBOLS: WHMIS (Canadian workplace hazardous materials identification system)

D2B – Product may irritate skin or mucous membranes

### Section 3. Composition/information on ingredients

#### Water (H<sub>2</sub>O) Remainder

Chemical formula/Name	Weight %	CAS #
Water	>50	7732-18-5
Potassium Acetate	< 45	127-08-2
Glycol Ether	< 1	112-34-5
Phosphate ester	< 1	na
Fluorosurfactant	< 1	proprietary

### Section 4. First aid measures

Eye Exposure: Irrigate eyes at eye wash station and repeat until pain free or at least 15 minutes. Seek medical attention immediately.

Skin Exposure: In case of contact, wash with plenty of soap and water.

Inhalation: If respiratory irritation or distress occurs remove victim to fresh air. Seek medical attention if irritation develops or persists.

Ingestion: If victim is conscious and alert, give 2-3 glasses of water to drink. Only induce vomiting on the advice of medical personnel. Seek immediate medical attention. Do not leave victim unattended. If victim is unconscious, lay victim on side with head lower than waist to prevent aspiration of swallowed product. If vomiting occurs and the victim is conscious, give water to further dilute the chemical.

Medical conditions possibly aggravated by exposure: none found

## Section 5. Fire fighting measures

Extinguishing media: solution is non combustible and non flammable – product is an extinguishing agent

Unusual fire/ explosion hazards: in a fire this material may decompose, releasing oxides of carbon (see Section 10)

Insensitive to mechanical impact or static discharge.

HMIS hazard ranking: health 1, flammability 0, reactivity 0

---

## Section 6. Accidental release measures

Large spills (one container or more) should be addressed by hazardous materials technicians following a site – specific emergency response plan and trained in the appropriate use of PPE. Clean up released material using sorbent socks for containment, followed by sorbent material inside containment. If deemed necessary, wear full face APR or PAPR with organic vapor cartridges (Section 8). Bag and drum for disposal. If product is used and/or contaminated use PPE and containment appropriate to the nature of the mixture. Prevent material from entering storm sewer.

Handle and dispose of as a hazardous waste unless testing indicates otherwise.

Decontaminate with detergent and water.

---

## Section 7. Handling and storage

Avoid eye, respiratory, and skin exposure. Store in cool, dry place away from oxidizing agents and use appropriate PPE (personal protective equipment) when handling, and wash thoroughly after handling (Section 8). Keep product in original container until packaging for use as extinguisher. Clean used equipment before storage. Use this product only in well ventilated areas. Do not mix with other extinguishing agents.

---

## Section 8. Exposure controls/ personal protection

During the application of this product against fires, exhaust gases and the products of incomplete combustion (PICs) are the principal respiratory hazards.

In the manufacture of extinguishers, automated systems and point source ventilation controls sufficiently minimize respiratory exposure. Employers and employees must use their collective judgment in determining occupational settings where the use of a respirator is prudent. The need for respiratory protection is not likely for the intended short-term use of the product in well ventilated areas.

Respiratory protection: In high concentrations or poor ventilation areas use air-purifying respirator (APR) or powered air-purifying respirator (PAPR) with HEPA cartridges when handling dry ingredients for low or short-term exposure. Use positive pressure supplied air respirators (SAR) or self contained breathing apparatus (SCBA) for high volume liquid applications.

Eye protection: wear chemical goggles or other splash protection.

Skin protection: use nitrile, latex, or similar gloves and coveralls. Good personal hygiene practices essential, such as avoiding food, tobacco products, or other hand-to-mouth contact when handling. Wash thoroughly after handling product.

---

## Section 9. Physical and chemical properties

Appearance: Clear to opaque liquid, odorless  
Specific gravity: 1.20 at 20°C (approximate)  
Solubility: soluble in water  
Non-flammable  
Flash point: not applicable  
Vapor pressure: <10 mm Hg @ room temperature  
pH: approximately 8.95 at 20°C  
Boiling point: product decomposes  
No explosive or oxidizing properties

---

## Section 10. Stability and reactivity

Stability: stable

Incompatibles: strong acids, strong oxidizers, and inorganic bases

Decomposition products: heat of fire may release carbon monoxide, carbon dioxide, and oxides of potassium.

Possibility of hazardous reactions: none

---

---

## Section 11: Toxicological Information

Target organs in man: respiratory system, eyes, skin. This product is a mild irritant to epithelial tissue, and may aggravate dermatitis. Ingestion may cause gastrointestinal injury. No information was found indicating the product causes sensitization.

Acute toxicity: Potassium Acetate: oral rat LD<sub>50</sub>: 3250 mg/kg body weight.

Chronic toxicity: This product's ingredients are not considered as "probable" or "suspected" carcinogens by OSHA, ACGIH or IARC.

Reproductive toxicity: This product's ingredients are not known to have reproductive or teratogenic effects.

---

## Section 12. Ecological information

Ecotoxicity: weak environmental toxin, specific negative effects unknown

Persistence/Degradability: moderate biodegradation in soil, rapid photolytic degradation in air

Bioaccumulation: extent unknown, unlikely

Mobility in soil: water soluble, slow to evaporate, may reach groundwater

---

## Section 13. Disposal considerations

This product is not a RCRA characteristically hazardous or listed hazardous waste. Dispose of according to state or local laws, which may be more restrictive than federal laws or regulations. Used product may be altered or contaminated, creating different disposal considerations.

---

## Section 14. Transportation information

This product is not a hazardous material under U.S. Department of Transportation (DOT) 49 CFR 172, and is not regulated by the DOT, IMO, IATA, RID/ADR, or Canada's TDG.

### Special Precautions for Shipping:

If shipped in a stored pressure-type fire extinguisher, and pressurized with a non-flammable, non-toxic inert expellant gas, the fire extinguisher is considered a hazardous material by the US Department of Transportation and Transport Canada. The proper shipping name shall be FIRE EXTINGUISHER and the UN designation is UN 1044. The DOT hazard class is Limited Quantity when pressurized to less than 241 psig and when shipped via highway or rail. Use a Non-Flammable gas label (class 2.2) when shipping via air.

---

## Section 15. Regulatory information

### International Inventory Status

Contains ingredients on the following inventories

Country(ies)	Agency	Status
United States of America	TSCA 8(b): Potassium acetate	Yes
Canada	DSI	Yes
Europe	EINECS/ELINCS	Yes
Australia	AICS	Yes
Japan	MITI	Yes
South Korea	KECL	Yes

### European Risk and Safety phrases:

EU Classification: XN Irritant  
R Phrases: 36/37/38 Irritating to eyes, respiratory system and skin  
S Phrases: 26 In case of contact with eyes, rinse immediately with plenty of water and seek medical advice  
36 Wear suitable protective clothing  
39 Eye/face protection

### U.S. federal regulatory information:

None of the chemicals in this product are under SARA reporting requirements or have SARA threshold planning quantities (TPQs) or CERCLA reportable quantities (RQs). None of the chemicals in this product are listed as Hazardous

Substances under the Clean Water Act or as hazardous air pollutants under the Clean Air Act.

State regulatory information:

Chemicals in this product under specific State regulations, as denoted below:

California - Permissible Exposure Limits for Chemical Contaminants: None

Florida - Substance List: None

Massachusetts - Substance List: None

Minnesota - List of Hazardous Substances: None

New Jersey - Right to Know Hazardous Substance List: None

Pennsylvania - Hazardous Substance List: None

California Proposition 65: No component is listed on the California Proposition 65 list or the No Significant Risk Level List.

---

#### Section 16. Other information

This MSDS conforms to requirements under U.S., U.K., Canadian, Australian, and EU regulations or standards, and conforms to the 2003 ANSI Z400.1 format.

The information herein is given in good faith but no warranty, expressed or implied, is made. Updated by Shaun A. Crawford, PhD, CIH.
